## **Your Crane and Lifting Experts**

From  
coast to coast,  
Cropac is your trusted  
partner for crane,  
lifting equipment and  
shunting solutions.

2025  
COMPANY PROFILE

[WWW.CROPAC.COM](http://WWW.CROPAC.COM)

# Built for Strength, Driven by Performance

---

From coast to coast, Cropac is your trusted crane and lifting expert for robust heavy equipment solutions. Whether you need shunt trucks for port operations, cranes for construction projects, or other equipment, we deliver quality and unmatched reliability to handle Canada's toughest demands.

With five locations across Canada, our team is always ready to support your projects wherever they may take you.

Depend on Cropac for outstanding services, unmatched industry expertise, and equipment designed to lift your vision to greater heights.

# Message from the CEO

---

At Cropac, we live by a simple yet meaningful mission: to provide you with the highest-quality equipment and exceptional service you can always rely on. As a proud family-owned, third-generation business, we've spent over 45 years supporting industries across Canada—whether on a construction site or port—by delivering solutions built to handle the toughest challenges.

As we introduce this new catalogue, I couldn't be more excited to showcase the incredible range of equipment, services and parts we offer. This collection reflects the core values driving us daily: quality, innovation, and safety. Every piece of equipment we provide is backed by a team that is passionate about what they do and committed to ensuring you have everything you need to succeed.

With five locations across Canada, we support you wherever your work takes you. Whether we provide the right equipment, service, or part or guide you through a project, our goal is simple: to be the trusted partner you can count on.

Thank you for choosing Cropac. I'm genuinely grateful for your trust in us, and I look forward to continuing to work with you.

Warm regards,

Bill Finkle  
PRESIDENT & CEO, Cropac

“ Our commitment goes beyond equipment. At Cropac, we are truly dedicated to helping our valued customers succeed, one project at a time. ”

# About Cropac

For over 45 years, Cropac has proudly served as a cornerstone in Canada's heavy machinery and lifting solutions industry. As a family-owned, third-generation business, we are built on a foundation of trust, expertise, and an unwavering commitment to helping our customers achieve their goals. From construction sites to ports and infrastructure projects, we deliver tailored solutions that empower industries to tackle their toughest challenges.

With five strategically located facilities across Canada, Cropac is uniquely positioned to meet the needs of clients wherever their projects take them. Our experienced team works closely with customers to understand their unique requirements, offering expert recommendations on the best equipment and services for every situation. Beyond sales, we provide comprehensive support, including repair and maintenance, rentals, training, and more.

Our extensive product lineup features renowned brands, including shunt trucks, cranes, and lifting equipment designed to excel in Canada's demanding environments. At Cropac, we know that downtime is never an option—that's why we prioritize reliable, high-performance equipment and responsive service to keep your operations running smoothly.

At the heart of everything we do is a simple promise: to be your trusted partner for exceptional equipment and unmatched support. When you choose Cropac, you're choosing a company that puts your success first.

## Our Vision

To be Canada's foremost provider of heavy equipment solutions, known for delivering top-tier products and unmatched service. Cropac is dedicated to consistent quality, reliability, and innovation, ensuring that our clients have the specialized equipment they need to drive productivity and meet the demands of any job.

# We provide new and used cranes, forklifts, telehandlers, and shunt trucks across Canada, delivering reliable solutions for all your needs.

Cropac is proud to be Canada's leading lifting experts, specializing in cranes, trucks, and material-handling equipment. With decades of experience, we offer an extensive inventory of reliable solutions from the industry's top brands. Whether you're tackling complex lifting challenges or everyday operations, we provide the expertise, equipment, and support needed to keep your business moving forward.

**We maintain a large inventory of new and used cranes across Canada, offering a wide range of options to meet your lifting needs, including:**

- All-Terrain Cranes
- Rough Terrain Cranes
- Lattice Boom Crawler Cranes
- Telescopic Boom Crawler Cranes
- Boom Trucks
- Tower Cranes
- High Capacity Lift Trucks
- Hydraulic Truck Cranes
- Carry Deck Cranes
- Telescopic Handlers
- Shunt/Yard Trucks
- Mini Cranes
- ...and much more!

# TADANO

## Cropac and Tadano deliver Canada's top cranes with expert support and service.

Tadano is a global leader in crane manufacturing, renowned for precision engineering and unmatched reliability. Designed to tackle demanding lifting tasks, Tadano cranes are trusted worldwide for their strength, quality, and versatility in various industries.

### **ALL-TERRAIN CRANES:**

Versatile and powerful, Tadano's all-terrain cranes are designed for both on- and off-road applications, making them highly adaptable. With impressive lifting capacities, these cranes excel in a wide range of construction and industrial projects, providing reliable and consistent performance across diverse job sites.

### **TRUCK CRANES:**

Combining mobility with lifting strength, Tadano's truck cranes allow for quick transport and rapid setup. Ideal for projects that require efficiency across multiple sites, they offer reliable performance and flexibility.

## **WHY CHOOSE TADANO CRANES?**

### **Commitment to Safety:**

Tadano prioritizes safety with advanced features that protect operators and ensure secure job site operations.

### **Exceptional Lifting Power:**

Built to handle heavy loads, Tadano cranes tackle large-scale lifting tasks with versatility across industries.

### **Operator Comfort and Control:**

Intuitive controls and ergonomic designs make Tadano cranes easy to use, enhancing operator comfort and productivity.

### **TELESCOPIC BOOM CRAWLER CRANES:**

With strong lifting power and maneuverability, these cranes excel on rough terrain and in confined spaces, ideal for heavy-duty, hard-to-reach tasks.

### **ROUGH TERRAIN CRANES:**

Compact and rugged, these cranes offer stability and easy maneuverability on uneven sites, performing reliably in challenging environments.

### **LATTICE BOOM CRAWLER CRANES**

Tadano crawler cranes offer exceptional lifting capacities while ensuring outstanding maneuverability under substantial loads.

### **Precision Engineering:**

Tadano cranes are manufactured at advanced facilities, ensuring the highest standards in quality, safety, and precision for reliable performance on even the most demanding projects.

### **Global Expertise and Reputation:**

Recognized worldwide, Tadano is a trusted leader in crane manufacturing, known for innovative designs, robust construction, and a commitment to consistent, top-quality performance.

## As their longest-standing dealer, Cropac proudly supports Manitex boom trucks across Canada.

Manitex specializes in high-performance boom trucks designed for heavy lifting. With a variety of models, Manitex boom trucks deliver strength, durability, and flexibility, making them ideal for construction, utilities, and industrial projects.

### **HIGH-PERFORMANCE BOOM TRUCKS**

Manitex offers a versatile lineup of high-performance boom trucks, engineered to handle heavy lifting across various industries. Renowned for their strength, durability, and precision, these trucks excel in demanding environments like construction sites, utility projects, and industrial settings.

From compact models for tight spaces to heavy-duty units for substantial loads, Manitex delivers flexible solutions to meet the unique needs of any job site. Cropac further customizes Manitex boom trucks to meet Canadian regulations and applications

ensuring they are optimized for local conditions and requirements.

Their boom trucks are designed to maximize efficiency while ensuring operator safety, even in challenging conditions.

With customizable lifting capacities, boom lengths, and features, Manitex ensures their trucks are tailored to your needs. Built with high-quality materials for long-term reliability, Manitex boom trucks minimize downtime, helping businesses maintain productivity and confidence.

### **WHY CHOOSE MANITEX BOOM TRUCKS?**

#### **High Lifting Capacity:**

Best in its class, Manitex boomtrucks can easily handle heavy loads, making them ideal for various lifting tasks across different industries.

#### **Durable Construction:**

Built to withstand rigorous use, Manitex boom trucks are manufactured using high-quality materials and craftsmanship for long-lasting durability.

#### **User-Friendly Operation:**

Equipped with intuitive controls and ergonomic design, these boom trucks ensure ease of use and enhanced operator comfort.

#### **Versatile Applications:**

Perfect for construction, HVAC, steel erection, utility work, and other demanding tasks, Manitex boom trucks offer flexibility to meet diverse project needs.

#### **Safety Features:**

Prioritizing operator and job site safety, Manitex incorporates advanced safety systems and features to ensure secure and efficient operation.

## Cropac is proud to support Kobelco cranes across Canada, providing dedicated service and expertise for all your lifting needs.

Kobelco is a global leader in crawler cranes, specializing in lattice-boom models known for strength, durability, and advanced engineering. With lifting capacities ranging from 80 to 330 tons, Kobelco cranes are built to meet the rigorous demands of construction, infrastructure, and industrial projects.

### **LATTICE BOOM CRAWLER CRANES:**

Kobelco's lattice boom crawler cranes are engineered for powerful lifting with unmatched stability, making them a go-to choice for large-scale infrastructure and industrial projects. With models offering lifting capacities up to 330 tons, these cranes are built to perform on challenging sites with precision and reliability. Their durable construction ensures consistent performance in demanding conditions, from heavy-duty construction to specialized industrial applications.

### **COMPACT STRUCTURE AND FEATURES:**

Kobelco's cranes are designed with a compact structure that improves transportability and setup, saving time and costs on sites. They feature spacious cabs with an advanced LMI touchscreen interface, offering operators clear visibility and control. With enhanced counterweight systems, including detection and self-installation mechanisms, these cranes prioritize safety, efficiency, and operator comfort, ensuring smooth, productive operations across environments.

## **WHY CHOOSE KOBELCO CRAWLER CRANES?**

### **Reliable Performance:**

Kobelco cranes are built with premium materials and components, ensuring durability and consistent performance in tough environments. These cranes are designed to handle heavy loads efficiently while minimizing downtime.

### **Advanced Technology and Safety:**

With features like self-ballasting counterweights, counterweight detection, and advanced LMI touchscreen controls, Kobelco cranes provide precise load management and enhanced safety. These innovative systems ensure reliable, consistent operation while prioritizing operator protection and efficiency on demanding job sites.

### **Operator Comfort and Control:**

Ergonomic cab designs, improved controls, and user-friendly interfaces make Kobelco cranes comfortable and intuitive, boosting productivity.

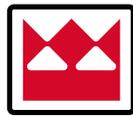

### **Efficient Design:**

Kobelco's cranes are engineered for fuel efficiency, reducing costs while minimizing environmental impact. Their design also allows for easy installation of a third drum, enhancing versatility for complex lifting tasks.

### **Global Recognition:**

Kobelco's commitment to quality and innovation has earned it a trusted reputation worldwide. Manufactured in Japan, these cranes are a preferred choice for complex lifting tasks.

# TEREX®

## Experience the strength and reliability of Terex cranes, delivered with Cropac's trusted service and support.

Terex tower cranes, available in hammerhead, flat top, and luffing jib varieties, are designed to tackle the world's most demanding jobsites. With a wide range of sizes and capacities, Terex cranes are known for their strength, quick setup, and durable construction, delivering reliable performance for years to come.

### **LUFFING JIB TOWER CRANES:**

Terex CTL luffing jib cranes are ideal for high-rise construction on compact urban sites, offering precise lifting capabilities in tight spaces.

### **FLAT TOP TOWER CRANES:**

Known for reliability, Terex flat top cranes are easy to assemble and maintain, providing cost-effective performance and operator comfort.

### **HAMMERHEAD TOWER CRANES:**

The Terex SK hammerhead tower crane series is engineered for reliability and ease of maintenance, ensuring excellent uptime on demanding job sites. With precise load control, an ergonomic cab, high-performance load charts, and advanced integrated safety features, these cranes deliver safe, efficient, and consistent performance for long, productive work hours.

## **WHY CHOOSE TEREX TOWER CRANES?**

### **Innovative Engineering:**

Terex cranes are designed with advanced engineering and quality craftsmanship, ensuring durability, precision, and dependable performance on even the most challenging job sites.

### **Global Expertise and Reputation:**

With a strong global presence, Terex is trusted worldwide as a leader in crane manufacturing. Known for robust construction and innovative designs, Terex cranes set industry standards in reliability and technology.

### **Commitment to Safety:**

Terex integrates advanced safety features in all cranes, ensuring secure operation and protecting operators on-site.

### **Exceptional Lifting Power:**

Built to handle heavy loads, Terex cranes offer versatility and strength for a wide range of lifting tasks across industries.

### **Comprehensive Support and Service:**

Terex offers extensive customer support, including parts, maintenance, and training, ensuring equipment remains operational and efficient.

# POTAIN®

## Potain cranes, designed for precision and reliability, come with Cropac's expert service and support.

Potain is a global leader in tower cranes, known for innovation, strength, and reliability. From high-rise buildings to infrastructure projects, Potain cranes are engineered to meet the demands of diverse construction environments with precision and efficiency.

### **LUFFING JIB CRANES:**

Potain luffing jib cranes deliver impressive lifting power in tight spaces. Their compact design excels in urban centers and industrial zones with strict height requirements or limited room to maneuver.

### **FLAT TOP TOWER CRANES:**

Designed for jobs needing multiple cranes nearby, Potain flat top tower cranes minimize interference with their low-profile design, making them ideal for crowded or overlapping crane operations.

### **SELF-ERECTING CRANES:**

Potain self-erecting cranes are designed for speed and versatility, making them ideal for small to medium projects. With rapid setup, easy transport, and the ability to navigate compact sites, these cranes boost productivity where space is tight. Their flexible design makes them perfect for residential builds, urban projects, and light industrial jobs. Advanced features ensure smooth operation, allowing crews to stay on schedule and deliver results efficiently.

## **WHY CHOOSE POTAIN TOWER CRANES?**

### **Reliable Performance:**

Potain cranes are built to handle demanding projects, known for their strength, durability, and consistent performance on job sites around the world.

### **Advanced Technology:**

Potain integrates state-of-the-art technology into every crane, including SM/DM Quick Lock systems for faster setup and Potain Connect telematics for real-time monitoring. These innovations enhance control, safety, and operator comfort, meeting modern construction demands.

### **Efficient Setup and Transport:**

With models featuring pannellized masts for quick assembly and mobility, Potain cranes reduce setup time and boost productivity, making them ideal for fast-paced projects.

### **Global Recognition:**

As one of the top tower crane manufacturers globally by volume, Potain is trusted worldwide, chosen by professionals for projects that demand precision, power, and reliability.

## Terberg Tractors supported by Cropac's expertise for advanced solutions in ports, logistics, warehousing and industrial operations.

Terberg tractors are renowned for their durability, innovation, and operator-focused design. Engineered for demanding environments, they excel in ports, distribution, terminal, and industrial operations. With advanced engineering and exceptional reliability, Terberg vehicles offer superior performance and comfort for logistics and material handling applications.

### **YT203EV**

#### **ELECTRIC SHUNT TRUCKS:**

The all-electric YT203EV delivers exceptional performance and diesel-level power with reduced emissions and maintenance costs. Battery options up to 236 kWh, regenerative braking, and thermal management ensure reliability in any weather. Terberg Connect enables real-time monitoring and diagnostics.

### **YT223 SHUNT TRUCKS:**

The YT223 is built for durability and comfort, featuring a galvanized chassis and a redesigned cab with fingertip controls. Its accessible layout simplifies maintenance, ensuring maximum uptime. Enhanced ergonomics and visibility further boost operator productivity. Optional Terberg Connect telematics enhances monitoring and proactive maintenance.

## **WHY CHOOSE TERBERG SHUNT TRUCKS?**

### **Environmentally Friendly Solutions:**

Terberg's electric models offer zero-emission performance, making them ideal for sustainable and environmentally conscious operations.

### **Low Maintenance Costs:**

With easily accessible components and fewer moving parts in the EV models, Terberg tractors reduce downtime and maintenance expenses.

### **Advanced Technology:**

Terberg Connect telematics provides remote monitoring and proactive maintenance, ensuring optimal performance and extended uptime. Integrated key card access enhances security, ensuring only authorized operators can access the vehicle.

### **Global Reputation:**

As the number one brand in terminal tractors, Terberg is renowned for quality, durability, and innovation across industrial and logistics sectors.

### **Operator Comfort:**

Terberg tractors feature ergonomic designs with spacious cabs, fingertip controls, and intuitive dashboards, ensuring maximum operator comfort and efficiency.

### **Exclusive Factory Upgrades:**

Cropac offers non-standard options to boost your Terberg vehicle's performance and adaptability. With upgrades like an enhanced Kessler rear axle and air ride suspension, we deliver tailored solutions for unique operational demands, ensuring comfort and reliability in demanding environments.

## Taylor Forklifts and Cropac—delivering dependable heavy-duty lifting solutions for diverse industries.

Taylor has been a leader in industrial lift trucks for over 90 years, offering robust and innovative machines built in the USA. Known for their rugged durability, advanced technology, and operator-focused designs, Taylor Forklifts are trusted for the toughest material handling tasks in industrial, manufacturing, and logistics sectors.

### **HEAVY-DUTY FORKLIFTS:**

Taylor heavy-duty forklifts are built to handle the most demanding lifting tasks. With capacities ranging up to 125,000 lbs, these machines provide unmatched strength and reliability for heavy industrial applications.

### **SPECIALTY LIFT TRUCKS:**

Taylor's specialty lift trucks are expertly customized to meet unique material handling needs. From lumber to steel to oversized loads, these robust machines deliver exceptional precision and power adapted to your industry.

## **WHY CHOOSE TAYLOR FORKLIFTS?**

### **Made in the USA:**

Manufactured in the USA, Taylor Forklifts maintain the highest standards of quality and craftsmanship.

### **Unmatched Durability:**

With over 90 years of innovation, Taylor Forklifts are built to last, offering long-term value and dependability.

### **Operator-Focused Design:**

Ergonomic cabs, intuitive controls, and superior visibility ensure operators work comfortably and productively.

### **CONTAINER HANDLERS:**

Taylor's are designed to meet unique and challenging material handling needs across industries. With advanced engineering and customized solutions, Taylor ensures safe and efficient operations in even the most demanding environments.

### **REACH STACKERS:**

Taylor Reach Stackers provide reliable solutions for container handling and stacking. Designed for optimal maneuverability and durability, these machines excel in ports, logistics hubs, and heavy industrial environments.

### **Built for Tough Applications:**

Taylor forklifts are engineered to perform in harsh conditions, delivering consistent strength and reliability across diverse industries.

### **Advanced Technology:**

Equipped with cutting-edge technology, Taylor forklifts enhance performance, safety, and operator control, ensuring efficient operations.

## Compact and innovative lifting solutions from Maeda, delivered by Cropac.

Maeda mini crawler cranes are designed to perform lifting operations in tight, confined, and hard-to-reach areas. Known for their compact design, lightweight build, and impressive versatility, Maeda cranes are ideal for both indoor and outdoor projects. From construction to industrial applications, these cranes provide reliable and innovative lifting solutions.

### **MINI CRAWLER CRANES:**

Maeda's mini crawler cranes feature a compact and lightweight design, allowing them to operate effectively in restricted spaces. Equipped with crawlers and advanced outriggers, these cranes are perfect for navigating confined areas where traditional cranes cannot reach, such as rooftops or indoor environments.

### **BATTERY-POWERED CRANES:**

Maeda battery-powered mini cranes deliver zero-emission performance, making them perfect for environmentally sensitive and enclosed job sites. These cranes combine powerful lifting

capabilities with advanced lithium-ion battery technology, offering an efficient, quiet, and eco-friendly operation, with the option for a lithium battery to suit specific needs.

### **TELESCOPIC BOOM CRANES:**

Built for versatility and precision, Maeda telescopic boom cranes are engineered to handle demanding lifting tasks. With exceptional reach and stability, they excel in a wide range of applications, from material handling to industrial projects. As the only manufacturer offering small (5-8 ton) telecrawlers, Maeda provides unique solutions for specialized lifting needs.

## **WHY CHOOSE MAEDA MINI CRANES?**

### **Compact and Versatile Design:**

Maeda cranes are built to work in confined spaces, offering a lightweight structure and excellent maneuverability for unique job site challenges.

### **Global Reputation:**

Trusted worldwide, Maeda is a leading name in compact lifting technology, recognized for its innovation, efficiency, and reliability.

### **Advanced Safety Features:**

Equipped with state-of-the-art safety systems, including load monitoring and precision controls, Maeda cranes ensure secure operation in all conditions.

### **Environmentally Friendly Solutions:**

With battery-powered options, Maeda cranes provide zero-emission performance, making them ideal for indoor use and environmentally conscious projects.

### **Reliable Performance:**

Maeda's innovative engineering delivers reliable lifting solutions for both small-scale and demanding tasks, ensuring consistent performance on any site.

# Cropac provides Magni telescopic handlers with unmatched support for versatile material handling solutions.

Magni telescopic handlers are renowned for their versatility, power, and precision in material handling. Designed to excel in industrial, construction, and agricultural environments, these state-of-the-art machines deliver exceptional performance. From lifting and digging to transporting materials, Magni handlers offer unmatched reliability for even the most demanding tasks.

### **ROTARY TELESCOPIC HANDLERS:**

Magni rotary telescopic handlers are built for multi-functional tasks, offering 360-degree rotation for flexibility. Ideal for construction, maintenance, and industrial projects, they provide precision and versatility for a wide range of applications.

### **FIXED TELESCOPIC HANDLERS:**

Magni fixed telescopic handlers deliver strength and simplicity, perfect for heavy lifting and transport tasks. With durable construction and intuitive controls, they perform reliably in agricultural, construction, and industrial settings.

## **WHY CHOOSE MAGNI TELESCOPIC HANDLERS?**

### **Innovative Design:**

With features like 360-degree visibility, intuitive controls, and state-of-the-art technology, Magni telescopic handlers prioritize operator comfort and productivity.

### **Unmatched Versatility:**

Magni handlers are designed for a wide range of applications, from lifting and digging to transporting materials, making them indispensable on any job site.

### **Global Recognition:**

Known worldwide for quality and innovation, Magni is a trusted name in material handling, providing solutions that meet the needs of modern job sites.

### **HEAVY-DUTY TELEHANDLERS:**

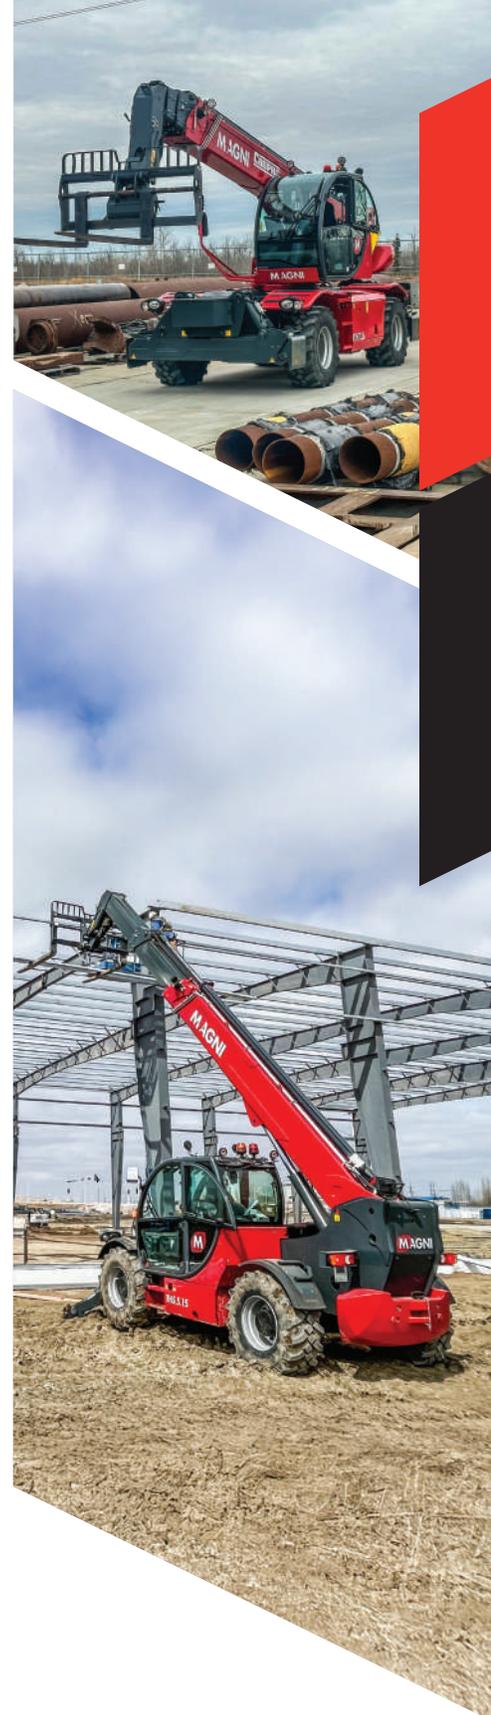

Engineered for heavy lifting, Magni's heavy-duty telehandlers feature impressive load capacities of up to 50 tons and exceptional reach capabilities. These machines are perfect for large-scale industrial and infrastructure projects, providing the power, stability, and durability needed for demanding tasks. With their rugged design and cutting-edge technology, they excel in the toughest environments, delivering unparalleled performance.

### **Powerful Performance:**

Magni handlers offer exceptional lift heights, reach, and load capacities, delivering reliable performance for construction, agriculture, and industrial projects.

### **Advanced Safety Systems:**

Equipped with features such as load moment indicators, automatic leveling, and dynamic load control, Magni machines ensure secure and precise operation, even in challenging environments.

# **BRODERSON<sup>®</sup>** **Manufacturing Corp.**

## Cropac delivers Broderon carry deck cranes with expert service and reliable solutions for compact lifting needs.

Broderon carry deck cranes are the go-to choice for compact lifting solutions across a wide range of industries. Renowned for their reliability, versatility, and maneuverability, Broderon cranes excel in confined spaces and challenging environments. From construction and industrial maintenance to utilities and manufacturing, these cranes offer precision and durability for demanding applications.

### **CARRY DECK CRANES:**

Broderon's carry deck cranes are compact, powerful machines designed to handle various lifting needs. Their design allows easy navigation through tight spaces, making them ideal for indoor and restricted-access environments. Equipped with features like 360-degree rotation and precision controls, these cranes deliver exceptional lifting performance in any setting.

### **ROUGH TERRAIN CRANES:**

Broderon rough terrain cranes are engineered for robust lifting in harsh outdoor environments. Featuring heavy-duty components and high ground clearance, these cranes offer stability and power for demanding construction and industrial projects. With intuitive controls and advanced safety features, they ensure efficient and safe operations even on challenging terrains.

## **WHY CHOOSE BRODERSON CARRY DECK CRANES?**

### **Compact and Maneuverable Design:**

Broderon cranes are specifically engineered to work in confined spaces, offering unmatched versatility, precision, and ease of operation.

### **Industry-Leading Safety Systems:**

Broderon cranes come equipped with advanced safety features, such as overload protection, precision controls, and stability systems, ensuring secure operation in all conditions.

### **Durable and Reliable Performance:**

Constructed with high-quality materials and components, Broderon cranes are built to last, delivering exceptional long-term performance and minimizing costly downtime.

### **Proven Expertise and Legacy:**

With decades of experience, Broderon has built a reputation for delivering innovative and reliable lifting solutions trusted across industries worldwide.

# Our priority is providing reliable OEM crane parts across Canada to minimize downtime and keep your equipment operating at its best.

Cropac is proud to be Canada's trusted source for crane parts, offering a wide selection for all makes and models. With decades of experience, we carry an extensive inventory of high-quality components to meet the demands of your operations. Whether it's routine maintenance or emergency repairs, we have the parts you need to keep your fleet running smoothly.

**We maintain a large inventory of genuine and high-quality crane parts across Canada, including:**

- Hydraulic Components
- Filters and Fluids
- Wire Rope and Rigging
- Electrical Systems
- Brakes and Clutches
- Engine Components
- Boom Sections and Pins
- Accessories and Attachments
- ...and much more!

Visit **CROPAC.COM** to see our full line of components and parts.

# LODAX

## Cropac provides Lodax pads and mats for durable and dependable equipment stabilization.

Lodax is a trusted leader in lightweight yet robust outrigger pads and mats, designed to improve stability and safety during operations. Known for advanced engineering and premium materials, Lodax products withstand extreme conditions, offering unmatched strength and longevity. Whether on construction sites, industrial facilities, or uneven terrain, Lodax pads and mats deliver dependable performance every time.

With a lifetime warranty and a "you break it, we replace it" promise, Lodax ensures peace of mind for every customer. It's the last pad you'll ever need to buy.

**Explore Lodax's range of high-quality stabilization solutions, tailored to meet the demands of your equipment and job site needs:**

- Lightweight outrigger pads
- Heavy-duty crane mats
- Modular mat systems
- Anti-slip stabilization solutions
- Customizable sizes and configurations

# elebia®

## Boost lifting safety with Elebia crane hooks, available through Cropac.

Elebia is a global leader in innovative lifting solutions, specializing in automatic crane hooks that enhance safety, efficiency, and ease of use. Built with high-strength structural steel and advanced electronic torque control, Elebia hooks are engineered to handle tough conditions and demanding rigging tasks. Their products minimize manual handling and maximize operational safety, making them a trusted choice in lifting technology.

**Explore Elebia's advanced range of automatic crane hooks and innovative lifting solutions:**

- Automatic crane hooks
- Safety latch systems
- Rotating and locking mechanisms
- Weighing scale upgrades
- Clutch-protected motors

## De Haan hook blocks from Cropac deliver reliable lifting solutions for every operation.

De Haan Special Equipment is a trusted name in crane blocks, providing a wide range of high-quality solutions for lifting operations worldwide. A solid brand since 1898, De Haan is known for its durability and adherence to strict safety standards. Their products are engineered to perform in demanding environments, including construction, wind energy, and custom applications. With an innovative approach, De Haan ensures safe and efficient lifting for every job.

**Explore De Haan's versatile and innovative range of hook blocks, designed to meet diverse operational needs effectively:**

- Open wedge sockets
- Hooks
- Overhaul balls
- Hook blocks for overhead traveling cranes
- Swivels
- Hook blocks for general lifting

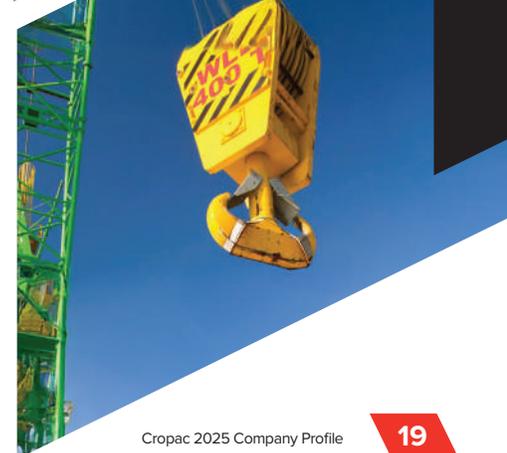

## Rely on RopeBlock components from Cropac for durability in lifting and rigging tasks.

Ropeblock is a leader in crane and rigging hardware, specializing in blocks, sockets, and sheaves. Their innovative Smart Engineering approach enhances safety and efficiency in lifting operations, ensuring dependable performance in demanding applications. Manufacturing and distributing thousands of components annually, Ropeblock is a trusted partner for industries worldwide.

**Explore Ropeblock's comprehensive range of high-quality products, designed to optimize lifting systems:**

- Crane blocks
- Smart Engineering solutions
- Wire rope sheaves
- Customizable components
- Lifting and rigging sockets
- Overhaul balls

# Crosby

## Reliable Crosby products, offered by Cropac, deliver unmatched quality for lifting and rigging needs.

Crosby is a global leader in rigging and material handling equipment, with over 130 years of innovation and expertise. Renowned for their unmatched safety, quality, and performance, Crosby products are built to exceed the toughest demands in industries like construction, marine, mining, offshore energy, and transportation. Rooted in tradition, Crosby continues to set the standard for lifting solutions worldwide.

**Discover Crosby's industry-leading range of lifting and rigging products, designed for superior durability and reliability:**

- Rigging hooks
- Shackles
- Turnbuckles
- Wire rope clips
- Hoist rings
- Lifting clamps
- Custom solutions for specialized applications

## Gear Products from Cropac deliver reliable transmission solutions for demanding tasks.

Gear Products is a globally recognized manufacturer of mechanical power transmission components, offering a wide range of solutions for industries including construction, energy, agriculture, and mining. Known for their modular hydraulic pump drives, slewing ring bearings, and swing drives, Gear Products combines innovative engineering with precision manufacturing to deliver unmatched reliability and performance.

**Explore Gear Products' comprehensive range of solutions, tailored to meet the diverse needs of your operations:**

- Hydraulic Pump Drives
- Slewing Ring Bearings
- Rotators
- Planetary Swing Drives
- Worm Swing Drives

# BRADEN CARCO Gearmatic

## Braden, Carco, and Gearmatic winches from Cropac deliver durable solutions for tough lifting jobs.

PACCAR Winch is a global leader in the design and manufacturing of winches, hoists, and drive systems under the renowned Braden, Carco, and Gearmatic brands. Built with superior engineering and durability, PACCAR products are relied upon by industries ranging from construction and oilfield operations to forestry and transportation. Their commitment to innovation ensures reliable performance in the toughest applications.

**Explore the extensive range of engineered winches and hoists designed to meet the demanding needs of any job site:**

- Hydraulic winches
- Drive systems for industrial applications
- Mechanical winches
- Customizable solutions for unique requirements
- Hoists for heavy lifting

## Cropac offers TWG winches and hoists for strength and reliability in lifting.

With over 75 years of experience, TWG is a leader in planetary winches and hoists, providing innovative solutions for infrastructure, recovery, energy, and marine industries. Custom-built for specific applications, TWG products are designed to handle the toughest jobs with precision and durability. Their products feature advanced engineering and high performance, ensuring efficiency in pulling and lifting tasks.

**Explore TWG's comprehensive range of winches and hoists, tailored to meet diverse operational requirements:**

- Hoists for lifting applications
- Customizable solutions for specific industries
- Planetary winches for heavy-duty pulling
- Line pull ratings from 3,000 lbs (13 kN) to 270,000 lbs (1,188 kN)
- Pullmaster planetary hoists

## Cropac offers Rothe Erde® slewing bearings for unmatched precision and durability.

With over 160 years of experience, Rothe Erde® a global leader in slewing bearings and rotational connection elements. Known for their innovation and superior quality, their products are designed to meet demanding applications with precision engineering and durable materials. From custom designs to rigorous quality standards, Rothe Erde® ensures exceptional performance in every solution.

**Explore Rothe Erde® advanced range of slewing bearings, designed for diverse industries:**

- Slewing bearings
- Rotational connection elements
- Custom-engineered solutions
- High-performance designs
- Global availability

## JTEKT **Koyo**

## Count on Cropac for Koyo bearings, precision-engineered for diverse industrial applications.

Koyo is a global leader in bearing technology, providing innovative solutions for industries ranging from wind energy to aerospace and high-speed transportation. With expertise in precision engineering and advanced materials, Koyo produces bearings that span from miniature sizes to large diameters up to seven meters. Their commitment to quality ensures exceptional performance in traditional industrial settings and cutting-edge applications.

**Explore Koyo's comprehensive range of bearings, designed to meet diverse operational needs:**

- Miniature bearings
- Large-diameter bearings
- Needle roller bearings
- Ball bearings
- Custom-engineered solutions

# Enhance safety with Greer Company systems, trusted by Cropac for reliable crane operations.

Greer Company, a division of TWG, specializes in electronic monitoring systems for cranes and boom trucks. With over 40 years of experience, they provide reliable Load Moment Indicators (LMI), Rated Capacity Indicators (RCI), and Anti-Two Block (ATB) systems. Their products are designed to prevent overloading and tip-overs, ensuring compliance with SAE and OSHA standards.

**Explore Greer Company's range of crane safety products, engineered for optimal performance:**

- Load Moment Indicators
- Rated Capacity Indicators
- Anti-Two Block Systems
- Crane Monitoring Displays
- Sensors and Service Parts
- Wireless wind speed indicators

# Trust Cropac for WIKA Mobile Control solutions, designed for precision in mobile operations.

WIKA Mobile Control specializes in high-quality mobile control systems designed to optimize safety, performance, and precision in demanding environments. From load moment indicators to custom electronic control solutions, WIKA's products ensure reliable performance for mobile machinery. Their expertise serves industries including construction, agriculture, and material handling.

**Explore WIKA Mobile Control's comprehensive range of products designed to optimize mobile machine performance:**

- Load Moment Indicators (LMI)
- Rated Capacity Indicators (RCI)
- Anti-Two Block (ATB) Systems
- Crane Monitoring Displays
- Sensors and Service Parts
- Wireless wind speed indicators

## Cropac delivers Crane Smart Systems for reliable, wireless load monitoring solutions.

Crane Smart Systems is a trusted name in the lifting industry, offering advanced wireless load monitoring and crane safety systems. Their innovative solutions are engineered to meet the demands of modern lifting operations, enhancing safety, accuracy, and efficiency. With user-friendly designs and durable construction, Crane Smart Systems delivers exceptional reliability in all lifting environments.

### Explore Crane Smart's range of intelligent systems designed for safe and efficient lifting operations:

- Wireless load monitoring systems
- Anti-two block systems
- Boom angle indicators
- Powerline indicators
- Crane data logging solutions
- Wireless wind speed indicators

## Cropac partners with 3B6 for cutting-edge crane electronics and monitoring systems.

3B6 provides advanced electronic systems for cranes and construction equipment, enhancing safety, performance, and efficiency. Their products include load moment indicators, wireless sensors, and custom monitoring systems, trusted worldwide for reliability in demanding applications.

### Explore 3B6's state-of-the-art electronic solutions for crane and lifting equipment:

- Load moment indicators
- Customized monitoring systems
- Wireless load and angle sensors
- Data logging and reporting solutions
- Anti-two block systems

## Enhance crane safety with RaycoWylie Systems, available through Cropac.

RaycoWylie Systems is a global leader in crane safety and control technology, providing innovative products designed to enhance operational safety and efficiency. With decades of experience, they specialize in Load Moment Indicators, Rated Capacity Indicators, and wireless monitoring systems. RaycoWylie's cutting-edge solutions are built to handle the demands of diverse industries, ensuring compliance and reliable performance.

### Explore RaycoWylie's comprehensive range of crane safety and monitoring systems:

- Load Moment Indicators
- Rated Capacity Indicators
- Anti-Two Block Systems
- Wireless Monitoring Systems
- Crane Data Logging Solutions
- Wireless wind speed indicators

## Cropac delivers LSI Robway systems, ensuring crane monitoring safety and performance.

LSI Robway is a global leader in wireless and cable-based crane safety solutions, trusted by industries worldwide. With over 30 years of expertise, they specialize in Load Moment Indicators (LMI), Rated Capacity Indicators (RCI), and Anti-Two Block (ATB) systems, ensuring enhanced operational safety and compliance. Their systems are built to deliver precise data, prevent overloading, and maximize efficiency in lifting operations.

### Explore LSI Robway's range of cutting-edge crane safety products designed for optimal control and monitoring:

- Wireless Load Moment Indicators
- Anti-Two Block Systems
- Wireless wind speed indicators
- Crane Data Logging Solutions
- Rated Capacity Indicators
- Service Parts and Sensors

**BECHEM**  
LUBRICATION  
TECHNOLOGY

## Cropac provides BECHEM lubrication solutions to enhance equipment performance.

BECHEM is a global leader in high-performance lubrication, providing innovative solutions for industrial and heavy-duty applications. Their extensive product line includes greases, oils, and specialty lubricants tailored to meet the demands of industries like construction, mining, and manufacturing. With advanced formulations, BECHEM ensures optimal performance, reduced wear, and extended service life for critical machinery.

### Explore BECHEM's wide range of industrial lubrication products:

- Multi-purpose greases
- High-temperature lubricants
- Hydraulic oils
- Gear oils
- Specialty lubricants for extreme conditions

## Keep equipment running smoothly with Lube-A-Boom solutions from Cropac.

Lube-A-Boom is an industry leader in lubrication products designed specifically for cranes, aerial lifts, and construction equipment. Their innovative formulas reduce friction, extend equipment lifespan, and improve safety by maintaining optimal performance. Trusted by operators worldwide, Lube-A-Boom products are built to withstand extreme conditions while providing superior protection.

### Explore Lube-A-Boom's range of high-performance lubrication solutions designed for heavy-duty equipment:

- Lubricants
- Greases
- Cleaners
- Specialty sprays
- Degreasers

# Enhance crane safety with HookCam, offered by Cropac for live video streaming solutions.

HookCam is a wireless camera system that attaches directly to the hook block of a crane, delivering a live video feed to the operator in the cab. Designed to eliminate communication challenges during blind lifts, HookCam provides a second set of eyes for improved coordination with riggers. This innovative system enhances safety, efficiency, and risk management on job sites.

### Explore the advanced features of HookCam, designed for improved crane operations:

- Wireless live video streaming
- Hook block-mounted camera system

# Trust Cropac for AMCS systems, designed for safe and efficient crane operations.

Founded in 1994, AMCS Technologies specializes in advanced electronic systems for construction site safety. Their cutting-edge solutions, focused on zoning and anti-collision for lifting equipment, enhance operational efficiency and minimize risks. With thousands of systems deployed worldwide, AMCS is trusted for its expertise in designing reliable and innovative safety solutions.

### Explore AMCS Technologies' innovative anti-collision and safety systems:

- Anti-collision systems
- Load monitoring systems
- Zoning safety devices
- Custom electronic solutions for lifting equipment

# SHELL LUBRICANTS

TOGETHER ANYTHING IS POSSIBLE

## Maximize performance with trusted Shell Lubricants, available through Cropac.

Shell is a global leader in lubricants, providing high-quality products designed to enhance equipment efficiency, prolong component life, and reduce downtime. With advanced formulations tailored for a wide range of industries, Shell's lubricants ensure smooth operations and deliver measurable value by reducing costs and optimizing maintenance schedules.

**Explore Shell's comprehensive range of lubricants and specialty solutions:**

- Engine oils
- Specialty lubricants
- Hydraulic fluids
- Coolants
- Greases

# Donaldson<sup>®</sup>

FILTRATION SOLUTIONS

## Count on Cropac for Donaldson filters, ensuring reliable filtration and engine protection.

Donaldson is a global leader in filtration solutions, delivering high-quality products for fuel, lube, coolant, and air intake systems. Their filters are designed to protect diesel engines, hydraulic systems, and bulk storage tanks, ensuring long-lasting performance and efficiency. With advanced technology and a comprehensive range of products, Donaldson meets the needs of industries worldwide.

**Explore Donaldson's extensive line of filtration products, engineered for maximum reliability:**

- Fuel filters
- Hydraulic filters
- Lube filters
- Bulk tank filtration systems
- Air intake filters

# As a trusted supplier, Cropac carries Fleetguard filters for premium filtration performance.

Fleetguard, a brand of Atmus Filtration Technologies, has been a trusted name in filtration since its founding by Cummins in 1958. Now an independent company, Atmus combines cutting-edge filtration expertise with a global reach. Fleetguard filters are designed to optimize equipment performance while supporting cleaner, more sustainable operations.

### Discover Fleetguard's wide range of filtration solutions designed for durability and efficiency:

- Oil filters
- Fuel filters
- Air intake filters
- Coolant filtration systems
- Hydraulic filters

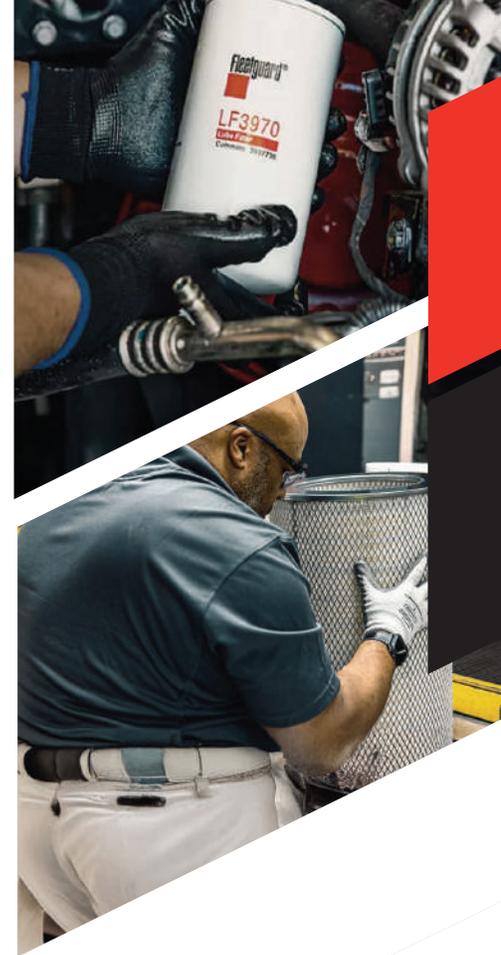

# Protect engines and equipment with Baldwin Filters, available through Cropac.

Baldwin Filters is a global leader in filtration solutions, dedicated to protecting engines and mobile equipment. With a legacy of innovation, Baldwin delivers superior product quality and the industry's most comprehensive product line. Their extensive distribution network ensures availability and outstanding service for customers worldwide.

### Explore Baldwin Filters' broad range of high-performance filtration solutions:

- Oil filters
- Fuel filters
- Air intake filters
- Hydraulic filters
- Coolant filtration systems

## Cropac delivers Premier products for secure, reliable, and tough industrial connections.

Since 1924, Premier Manufacturing has been a leader in pintle hitch production, renowned for innovation and durability. As the creator of the first-ever pintle hook, Premier has set the standard for reliable couplings and drawbars. Their products are designed to handle heavy-duty trailers with ease, offering flexible movement and exceptional performance across agricultural, military, and industrial applications.

**Explore Premier Manufacturing's trusted range of couplers and drawbars, built for tough applications:**

- Pintle hooks for secure connections
- Heavy-duty couplers for trailers
- Adjustable drawbars for flexibility
- Custom-engineered solutions for specialized needs
- Durable components for long-lasting performance

## Cropac provides Viking Mud Flaps, trusted for durability and protection in harsh road conditions.

Minimizer is a leading manufacturer of premium aftermarket products for heavy-duty trucks and trailers. Known for their durability and innovation, Minimizer's product lineup includes fenders, floor mats, toolboxes, and more. Designed to withstand the toughest conditions, Minimizer products help reduce maintenance, enhance performance, and extend the lifespan of your equipment.

**Explore Minimizer's high-quality products tailored for heavy-duty vehicles:**

- Poly fenders
- Floor mats
- Toolboxes
- Mud flaps
- Customizable truck accessories

# OVP GROUP

## Rely on Cropac for OVP Group lifting solutions designed for industrial and construction needs.

OVP Group is a leader in lifting equipment for manufacturing, industrial, and construction industries. Their products, designed by licensed professional engineers, meet or exceed the most stringent safety standards. From manbaskets to concrete buckets, OVP equipment combines innovation, durability, and performance to deliver reliable solutions for complex lifting tasks.

**Explore OVP Group's wide range of specialized equipment tailored for lifting and material handling:**

- Manbaskets
- Concrete Buckets
- Crane Forks
- Self-Dumping Bins
- Spreader Bars

## Discover Ancra Cargo winches with Cropac, engineered for reliable cargo securement.

Ancra Cargo is a global leader in cargo securement, offering innovative products designed for strength, reliability, and efficiency. With a focus on high-quality materials and robust construction, Ancra winches and accessories are built to handle the toughest environments. Their commitment to engineering excellence ensures securement solutions that streamline operations and enhance safety.

**Discover Ancra Cargo's wide range of winches and securement products, tailored for maximum performance:**

- Sliding winches for adjustable positioning
- Recovery straps and tie-downs
- Chain binders for heavy-duty securement
- Winch bars and webbing straps
- Custom securement solutions
